Eat **healthy, tasty** food.

**Save money** on energy versus traditional stove steaming.

**Sustainable** for the environment (save energy and lasts a lifetime).

\*\*Unique product is made with encapsulated metal, so it blocks the microwaves that normally cook foods, and directs them to the Water Tray--creating steamed delicious, nutritious meals in minutes.

### BENEFITS OF STEAMING FOOD

*Steaming as a method of cooking is thought to pre-date the discovery of fire, when foods were steamed over hot springs or stones. Asian cooking has always used steaming as a main cooking method, both for health reasons and because ovens are rare.*

- Steaming allows cooking any type of food and is a well-known method for fat-free cooking. It also retains nutrients, fatty acids minerals and vitamins.
- Steaming does not mean bland cooking. The colors are more vibrant, the texture stays firm, the natural flavors are better preserved and the herbs or condiments can develop their aroma fully. Add herbs or spices to the water to add a specific taste. You can also accompany your meals with sauces for a richer taste.
- Steaming is perfect for the whole family – and a great way to introduce vegetables to children who will appreciate the festival of authentic colors and tastes on their plate.

\*Microwaves of less than 1200 watts will take a bit longer to cook items in Smart Steamer.
